Fraser Global Mentorship Program

Mentor Profile

Originally from India, Manjyot started out her sustainability journey when she got accepted to the MS in Sustainability program at ASU. Thanks to the interdisciplinary nature of the degree, Manjyot concentrated in corporate sustainability and took classes across the school of business, law, and urban planning. Manjyot received her PhD in Public Administration and Policy from American University. She got interested in mentoring students since she had benefitted from the mentors that guided her through her academic and professional career. She also believes that this opportunity would be a small yet a significant way to give back to the ASU community. At present, Manjyot is working in the climate and energy practice at World Wildlife Fund in Washington, DC.

Organization Profile

World Wildlife Fund (WWF) is one of the world’s leading conservation organizations, working in 100 countries for over half a century. With the support of more than 5 million members worldwide, WWF is dedicated to delivering science-based solutions to preserve the diversity and abundance of life on Earth, halt the degradation of the environment and combat climate change. Visit www.worldwildlife.org to learn more and keep up with the latest conservation news by following @WWFNews on Twitter.

Global Sustainability

Manjyot focuses on international climate policy and manages the Alliances For Climate Action, a global initiative that works with cities, states, regions, businesses, academia, and other stakeholders across the world on collaborative partnerships to help national governments meet their Paris climate goals.

Site Visit

Site visit will be coordinated between mentor, mentee, and School of Sustainability once the mentorship connection is made. Opportunities may include: regular mentorship via phone, shadowing during meetings, introduction to other WWF colleagues across teams.
